

I am opposed to the expansion of LPFM for the following reasons. There is a radio station (K-LOVE), which I listen to very much. It is an inspiration to me when I am down/depressed/sad. The music which they play (Gospel) is very uplifting and the messages they play, which are comments from other listeners, are a blessing to hear and helps prove that there are some great people all over this world, no matter what culture. I have suggested to young people to listen to this station who were having problems in school and with friends and it has changed their lives. To displace K-LOVE by an LPFM broadcaster would be a shame in that there may not be another inspirational station in this listening area. I have heard several testimonies from men, women, and kids that their lives have been changed by this one station and the service it provides touches the hearts of many thousands of people and their lives. Many people like myself do not call in and give their testimonie such as myself for various reasons, so there are probably many more thousands of them/us that are changed by listening to K-LOVE. Please reconsider your plans for implementing LPFM to prevent the loss of K-LOVE and many other stations such as these that will be such a great loss to so many thousands of young and old alike.

Thank you,
Charlie Sims
